SOFTWARE / AI AUTOMATION / INDUSTRIAL TECHNOLOGY

ADITYA CHOUBEY

AI-ASSISTED DEVELOPMENT • WORKFLOW AUTOMATION • INDUSTRIAL APPLICATIONS

BHOPAL / DURG +91 70008 28276 adityachoubey259@gmail.com

PROFESSIONAL PROFILE

Third-year Electrical & Electronics Engineering student with hands-on experience across industrial software and AI automation projects. Builds practical applications using Python, web technologies, APIs and intelligent workflows, with a strong focus on prompt engineering, debugging and converting business requirements into usable solutions.

EXPERIENCE

Industrial Trade Link (ITL) — 6 MONTHS

Industrial software, safety checklist workflows and hardware-software monitoring with RS485 integration.

CAITPL — 3 MONTHS

Contributed to XecroAI, a practical inspection and issue-tracking application for plant environments.

tirth.ai — 3 MONTHS

Worked on n8n automation workflows and a Python-based website support system.

SELECTED PROJECTS

01 XecroAI — CAITPL

Built a visual industrial inspection workflow for issue reporting, site/location details, criticality, evidence and follow-up tracking; includes dashboards and kiosk-oriented use.

02 ITL Checklist — ITL

Developed a digital checklist for industrial PC use, supporting structured safety checks, consistent record capture and shop-floor deployment.

03 RS485 Industrial Monitoring — ITL

Integrated monitoring hardware with supporting software and an RS485 communications module to connect industrial devices and bring equipment data into an application.

04 n8n Workflow Automation — TIRTH.AI

Designed connected n8n workflows for inquiry handling, routing and repeatable business processes, using AI-assisted classification and service integrations.

05 Python Website System — TIRTH.AI

Developed a Python-based system supporting website operations through backend processing and automation of repeatable application tasks.

ALSO BUILT | Smaller tools, prototypes and software automations for practical business and engineering tasks.

TECHNICAL TOOLKIT

Programming & data

Python • DSA • Data Analytics • PostgreSQL • Power BI

Web development

HTML • CSS • JavaScript / TypeScript (intermediate) • APIs

AI & automation

AI/ML fundamentals • n8n workflows • AI analysis

Working approach

Prompt engineering • AI productivity • Debugging • Rapid prototyping

CURRENTLY ADVANCING

C++

Recently started learning; quick to adapt to new languages and tools when required.

Industrial hardware

PLC / HMI / SCADA programming and wiring; building practical proficiency.

Drone technology

Basics of assembly, component selection, electronics and programming.

PRACTICAL WORKSHOPS

1–2 month workshop-based exposure to PCB design, cybersecurity, deployment, domains and DBMS.

EDUCATION

B.Tech · EEE

LNCT Bhopal (RGPV) | Third year | Expected 2028
